REASONS FOR ALLOWANCE

1. Claims 1, 3-9, 51-52, and 54-56 are allowed.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with William D. Pegg, Reg. No. 42,988 on May 25, 2007.

In the claims:

Claims 10-50 are cancelled.

3. The following is an examiner's statement of reasons for allowance: The closest prior art, Sines et al. (U.S. 5,934,672), discloses a slot machine having a plurality of optical fibers (52) arranged with image input ends (53) adjacent to an image source-the symbol bearing outer surface of reel (51). The image input ends (53) form an image collector which is shaped or otherwise configured to gather an image from the reel. The optical fibers form an image conveyance which transfers the image or images gathered from the reel, and conveys them to a viewable presentation. This is done at optical fiber display ends (54). The display ends (54) of the optical fibers are positioned so as to form an image emitter or image emitting array which is either directly visible or passed through one or more lenses or screens (55) in order to focus or otherwise enhance the image viewed by the player. See Fig. 8 and Column 8, lines 24-53.

Conversely, claims 1, 8, and 51 of the instant invention is directed to a slot machine having a plurality of optical fibers having first ends optically coupled to said surface of said image display

device and second ends for displaying simulated mechanical reels, at least some of the second ends define a radius of curvature that approximates the radius of curvature of a mechanical reel. Sines fails to disclose, teach, or fairly suggest this feature. This claimed feature enables the instant invention to provide a slot machine having increased versatility while having simulated reels that are displayed aesthetically similar to traditional mechanical slot reels.

Oath/Declaration

4. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because: the duty to disclose statement should recite the following statement exactly:

"I acknowledge the duty to disclose information which is material to patentability of this application in accordance with Title 37, Code of Federal Regulations Section 1.56."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott E. Jones whose telephone number is (571) 272-4438. The examiner can normally be reached on Monday - Friday, 8:30 A.M. - 5:00 P.M..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert E. Pezzuto can be reached on (571) 272-6996. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
